REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Note that support for the weight ratio of the high and low performance elastomers is inherently found at page 31 of Applicant's specification. In the amendment of 02/17/04, Applicant pointed out and calculated to demonstrate that the weight ratio the high and low performance elastomers and the filler contents are within the ranges recited in the claims (see page 4 of the amendment). The 102 art rejections over McCormack have been overcome by the present amendment while the 103 art rejections over McCormack are rendered moot in view of evidence of common ownership (page 6 of the amendment filed on 02/17/04). The double patenting rejections have been overcome by the present amendment and response (the last full paragraph at page 6 of the 02/17/04 amendment). The art rejections over Brady have been overcome by the present amendment and response (see page 2 of Applicant's interview Summary filed on 04/20/04). In addition, the film of Brady containing 44 parts by weight styrene-based elastomer and 56 parts by weight polyolefin based on the combined weight of styrene based elastomer and polyolefin (material E, example 7) has WVTR less than 100 g/m²/24hours (tables 5-7) which is about 10 times less than the WVTR required by the claims. None of the cited art, alone or in combination, teaches or suggests a breathable, stretched thinned elastic film comprising the weight ratio of the high and low performance elastomers as recited in the instant claims, the instant claims are deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
